The Gamezebo staff had no less than five games in the running for best adventure game of 2007, and none quite lived up to it. The writer's pick was just that. Grand Theft Auto 4 was gorgeous. A damsel in distress, a panicked dash out of a mansion, and a bustling city-like setting made for a gripping moment-to-moment experience that would be silly to take lightly.

Whether or not it's silly at all, Grand Theft Auto 4 is pure entertainment. The UI could use some work -- I hate walking through buildings just to look at people! The PC version doesn't appear to be locked down by EA, so we'll see if it stays that way. It's still the game of the year, though.5 out of 5 GameSpotThe scenery is immense, the stories are rich, the driving is fast, and the color palette is varied. Grand Theft Auto 4 manages to be dense with gameplay and even more dense with detail. It's difficult to find a game of this scope that offers this much both in terms of level of detail and gameplay variety.5 out of 5 Game InformerAs with every Grand Theft Auto game, there are several side quests, missions, or activities that you can take part in. Most of these are relatively easy, but some require a bit of thought to complete.

Rockstar is capable of delivering more complex storylines and more varied side quests than the other big-name developers. Grand Theft Auto 4 also offers free roam of Los Santos and Blaine County, which is what I personally prefer. Because you are a thief, you can help yourself to what you want, and the game doesn't mind. Rockstar has once again created a fun and furious game, which is both realistic and fun. Fans of the genre will love it.4 out of 5 Official U.S. PlayStation Magazine Rockstar's Grand Theft Auto is in a league all its own. There are few games as expansive as this one, and they're all in a league of their own. No one does the genre like Rockstar. The series has a unique sense of humor and a delectable take on all that is wrong with the world. GTA 4 is only the latest entry in an unending, masterful game. It's a must-have for fans of all genres.4 out of 5 Official U.K. PlayStation Magazine Grand Theft Auto, with its deviously brilliant parody of the GTA series, has redefined our expectations. The single player game is as great

**solitaire puzzle game with a straightforward premise, "Open World Game" was published by Nintendo in 2006. You are a prisoner in an unnamed jail. You must activate machines to get out. Note: Outward Bound was published by iNiS. A young man sees you sitting in the sun on a bench. He takes your wallet, you get angry. Note 1: The name is a pun on the English word "Outward", whereas "Eward" can be a short form of "Inward". Note 2: Other forms of the name can be "Outward Bound", "Outward Bound 7", or any other Outward-word form. The man says you are a little old for jail, but he will be your best friend at the jail you know about. To get the address, he asks about your age. He says to keep 20 pieces of 50 dollar bills. The man leaves, and before locking you up, he gives you the dead man's cell number. As you get to the cell, a man is outside and sees you coming. He insists his name is "Pretty". He asks if you have kept the cash in that bank. He says that his doctor thinks he has a higher chance of survival if you get that cash for him instead of him getting it from the police. He says to bring your wife. You say you have a wife, but he insists that it is your girlfriend. He walks away if you decide to become his agent. The doctor tells you that Pretty has a heart condition. If the doctor must work on him, you get a riddle. It says: I'm a number - 2-7: Seven is more than 4, but is still less than 11, and fewer than the number of people I dye. The player must think**
